the RECORD MAKING BULL

Increasingly the ads stress **Individual Performance**. We think this is a great new development. Hidden Hills has been stressing average performance based on progeny and performance of three to four generations.

Individual performance is **good**, but **overall average** weaning (205 days); yearling (365 day) and carcass performance of progeny is the best insurance.

Our last 60 consecutive bulls averaged 1000 lbs. at 365 days.

Over 50% of all Champion Carcasses in the ENLS and Maryland Carcass Shows have been by 492-17 and his sons.

Why not be **sure** instead of **half-sure** about your next calf crop. Yearling bulls are available with built-in, documented high performance behind them.

Write for facts on our progeny tested herdsires and dams.
